FIBER-OPTICAL SERIES

DUSB

> WIDE DYNAMIC RANGE

> WIDE EXPOSURE RANGE

HDR -380

Digital Dental X-ray Imaging System

Product Parameters

Fiber Optic Plate

The built-in FOP can take more realistic high-definition images, and even cracked teeth can be easily found.

Wide Exposure Range

Size 1.5 sensor, shooting width 24 mm.

Wide Dynamic Range

Easy to shoot from low dose to high dose, greatly reducing the requirements for filming experience. Image clarity and sensitivity are significantly improved.

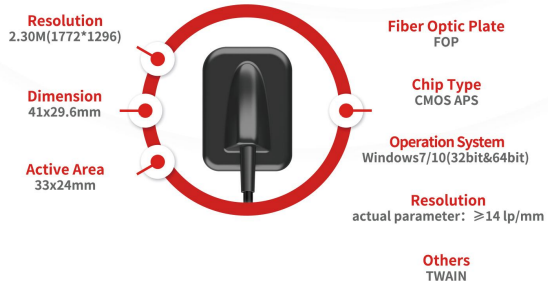

HDR-380 lower molars

HDR-380 stomach teeth

GOOD SMILE DESIGN

PORTABLE
HIGH-FREQUENCY X-RAY UNIT

▲ *Easy Operation* ▲ *Small Size* ▲ *High Penetration*

XR(P)

CE

Functional Features

Compact Design

DSLR design,easy to use.
Compact size with light weight of only 1.9kg.
To take as you go,easy to operate.

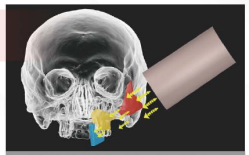

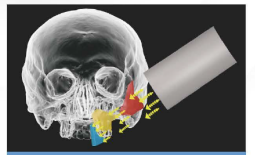

User-friendly Design

Radiation well-controlled,real-time monitor of radiation dose. Childproof lock,safety protection for children,prevents misuse. Power-on self-test, easy troubleshooting.Digital display,easy to operate.

Advantages of 70kV 2mA

Fast exposure time
Increased X-ray penetration
High effective dose rate
Effective reduction of image blur

Low voltage and low current

High voltage and high current

Product Parameters

Model	XR(P)	Loading Time Adjustment Range	0.04s-2.0s
Tube Voltage	70kV±10%	Focus	0.4mm
Tube Current	2mA±20%	Net Weight	1.9kg
Charger Input	100-240V~	Pipe Assembly Weight	1.1kg
Ray Type	X Ray	Battery Capacity	2500mAh
